

scan-spray

Point-of-Care Ultrasound Scan Spray

Smarter than gel.
Cleaner, faster, and patient-friendly.

**Introducing the
future of
PoCUS scanning**

Introducing a breakthrough in point-of-care ultrasound (PoCUS) technology—our spray-on ultrasound medium is transforming patient experience and clinical efficiency.

Unlike traditional thick, gloopy gels that can feel cold, sticky, and uncomfortable, this advanced spray format offers an alternative that enhances patient comfort without compromising image quality. Designed for modern healthcare environments, **it streamlines the scanning process, reduces mess, and supports faster workflows.** This is not just an upgrade—it's the future of PoCUS scanning.

Instant & Effortless

- Scan-spray saves time. Just spray and scan - no spreading.
- Up to 5 times more scans per bottle vs. traditional gel.

Clean & Hygienic

- Single-use easy to hold "Skittle" bottles. Reduces cross-contamination.
- No sticky residue—patients leave feeling clean and comfortable.

Superior Imaging Performance

- High conductivity for clear, high-resolution scans.
- Probe safe formula preserves equipment integrity.
- Provides uniform coverage on irregular or curved body surfaces - no bubbles and no missed scan spots.

Safe & Patient-Friendly

- Dermatologically tested and approved.
- Apply at room temperature without chilling effects, this together with the non-greasy feel is an advantage when applying to paediatrics or in emergency care.

Streamlined Workflow

- Minimal cleanup reduces staff workload and scanning downtime.
- Ready-to-use anywhere - all radiographers, ICU, ER, bedside, ambulances, or with hand held devices next to a sports field.

Save cost

**Quality
transmissions**

**Use less
than gels**

**Reduce cross
infection**
